

URRICULUM ALESSANDRO GAIANI

Summary of the profile

The common thread of the research carried out within the discipline is the concept of sustainable mutation declined in the different years and fields (rural, industrial, social, methodological) both through the transformation of the existing heritage and in the definition of new projects and methodologies, with reference constant to the results of the disciplinary researches of the last fifty years, in which reading, theory and project are dialectically related, feeding on mutual references, typical of the history of Italian architecture and its peculiarities.

The academic excursus of thought, research and methodology over the years assumes as its own some historical and contemporary concepts, hybridizing them, reinterpreting them through tools derived from the characteristics of the disciplinary studies of the recent past and their reinterpretations. A dialectic combination, that between history and rereading of the present, constant prerogative of Italian architects, which I recall in the researches and projects of my disciplinary path.

The idea that strongly orientates my studies is that of an architecture capable of questioning itself with respect to its fundamental elements and its relationship with the city and the community that inhabits the places of the built and tries to relate them through an assembly path that it includes the memory and the complex social problems of our time, and derives, in part, from an interpretation of the typological classification system as an evolutionary and dynamic principle applied to spaces and situations today of "waste", in part from adaptive logics for use of a structure that changes and is configured according to the conditions of the context.

Specifically this idea of architecture and the constant presence of the concept of sustainable mutation, has been articulated and evolved as a thought and outcome in my research, declined in specific areas that summarize as follows:

From the second half of the nineties I take care of the territory of the scattered houses of the great plain. Resuming the studies made by the Stems and the Ortolani, through a type-morphological reading of the buildings and the courts, I come to a more accurate definition of the typologies present in the territory, and in particular the research focuses on the Delta area where collaboration of Delta 2000, prepares a study of cataloging all the rural assets present in the area, and prepares design guidelines for their mutation according to their own reinterpreted characters.

Beginning in the two thousand years the research focuses on the recovery of abandoned assets, with particular interest in the areas of sugar refineries, large abandoned factories that the delocalization of agricultural production has left as giant cathedrals in the desert, frequent in the territory of the great plain. First of all, a survey and mapping of the pre-existing areas and their classification was carried out, to then identify the design mutation methodologies of the same.

The interest in social housing has been the focus of studies since 2000. First of all in the search for the relationship between the forms of living and the architectural project, then on the possible and different project scenarios for social housing in its multiple declinations. Social housing is interpreted through a new system of constantly changing living spaces and a design / construction implementation of buildings. The research of the period converges into a series of projects for social housing based on the mutation, temporality and sustainability of the design, economic and construction process.

From the second decade of the 2000s, research is oriented towards a new declination of the project's sustainability according to the changed socio-economic scenario of the city.

The new forms of contemporary living are investigated, the suggestions of economic and social disciplines (the concept of circularity and conditioning) declined in an architectural thought that, with respect to the historicity and typical Italian architecture, initiates possible contaminations and introduces the variable of sustainable contemporaneity : the Community / Community.

The research and the design implications define a system of hybrid, circular architecture project in

which the re-conditioning is the strategy, capable of requalifying not only the abandoned containers and spaces of the city, but links, relationships with applicative, evolutionary and adaptive tools. of the discipline.

A - GENERAL DATA

- Alessandro Gaiani was born in Bologna on 1 March 1963.
 - Graduated in Architecture in the academic year 1987/88, March 23, 1989, at the Faculty of Architecture of the University of Florence, Department of Processes and Methods of Building Production, with 110 out of 110 points and honors
 - Starting from the degree he carries out research and teaching activities at the Department of Processes and Methods of Building Production of the Faculty of Architecture of the University of Florence up to the academic year 1992/93, as an expert on the subject of "Environmental Design".
 - From the academic year 1992/93 he carried out research and teaching activities at the Institute of Architecture of the Faculty of Architecture of the University of Ferrara, as an expert on the subject of "Architectural Composition 2" for A.A. 1992/93, a lover of the subject of "Architectural Composition 1" for A.A. 1993/94, an expert in the subject of "Analysis of urban morphology and building typologies" for A.A. 1994/95 and 1995/96 holding cycles of communications and exercises.
 - From the A.A. 1994/95 to the A.A. 1998/99 is Adjunct Professor at the Faculty of Architecture of the University of Ferrara, for teaching ARCHITECTURAL COMPOSITION characterizing discipline of the architectural design laboratory I.
 - English diploma awarded by the Anglo-school of London regarding the development of a language learning course held in October 1997
 - Classified in various design competitions, he won the European 3 award in 1994.
 - known languages: English, French.
 - Since November 1999 he is Researcher in Architectural and Urban Composition, disciplinary scientific sector ICAR 14 at the Faculty of Architecture of Ferrara
 - Since November 2003 he is a confirmed researcher in architectural and urban composition, scientific disciplinary sector ICAR 14 at the Faculty of Architecture of Ferrara
- In 2004 and 2005 was a visiting professor at the Moscow Architectural Institute with a course in Architectural Design with Prof. Serguei Brovchenko
- In particular, he stayed in the Netherlands, whose experience is documented with the essay The Dutch experience, renew with tradition, within the volume, AA.VV., "Designing in the urban fabric", 1993, where project paths are exposed of experiences taken as case studies for the design of already consolidated urban fabrics; and in Paris, whose experience was used for the drafting of the Garages and Libraries chapters within the "Building Design Manual" of the book publishing house Ulrico Hoepli, 1992;
- Has acquired a good knowledge of the IT tool for planning and research purposes both in the university and in the professional field.

The activity then developed also in the study of the expressive modes of representation with particular reference to automatic image processing techniques, multimedia and hypermedia systems.

From the mid-nineties he took care of the cultural heritage of the rural houses of the Emilia Romagna plain, first with a work of surveying and cataloging later with publication on their possible transformation

Since 1999, residential construction has become the subject of research on which public funding has received PRIN and local FAR. In particular, the research focused on a new system of systemic design process based on open and continuously evolving mechanisms.

Since 1999 he has been a member of the research center ARCADES (Architectural Design), Department of Architecture, Ferrara, where he develops research, publications, training in the field of architectural

design

She has been organizing study trips for students and architects in Europe since 2002.

Since 2007 he is a member of the PhD in "architecture technology" and was tutor of a thesis discussed in the XXII cycle entitled "the sustainability of public space in residential construction - paradigm towards environmental process innovation" discussed in March 2011

• She is on the Evaluation Committee for the award of the Ph.D. in: ARCHITECTURAL COMPOSITION with administrative office at Alma Mater Studiorum - University of Bologna 2009

Architectural Design methods are presented in the Architectural Design courses, both new and past, with particular reference to the history of modern Italian as a connection to a project identity.

From 2014 to 2015 he is a member of the Academic Board of the research doctorate International PhD Architecture and Urban Planning IDAUP.

B - Curriculum of teaching

The teaching activity carried out continuously since graduation is addressed to the investigation and development of new methods for the architectural and urban design.

B.1 Collaboration teaching as an expert on the subject of "Environmental Design" for AA 1990/91 at the Faculty of Architecture of the University of Florence. In addition to following the regular exercises and participate in the examining, delivered to the students of the course the following two communications entitled:

- The problem of mobility and parking in urban areas;
- Methodologies for the design of garages and parking lots.

B.2 Collaboration teaching as an expert on the subject of "Environmental Design" for AA 1991/92 at the Faculty of Architecture of the University of Florence. In addition to following the regular exercises and participate in the examining, delivered to the students of the course the following two communications entitled:

- The case of the Netherlands, a tradition of modern architecture, robust and evolving - the first part;
- The case of the Netherlands, a tradition of modern architecture, robust and evolving - the second part.

B.3 Collaboration teaching as an expert on the subject of "Architectural Composition 2" for AA 1992/93 at the Faculty of Architecture of the University of Ferrara. In addition to following the regular exercises and participate in the examining, delivered to the students of the course the following four communication entitled:

- The case of the Netherlands, a tradition of modern architecture, robust and evolving - the first part;
- The case of the Netherlands, a tradition of modern architecture, robust and evolving - the second part;
- The tendency of contemporary Dutch design examples of some young Dutch architects - the first part;
- The tendency of contemporary Dutch design examples of some young Dutch architects - the second part.

B.4 collaborative teaching as an expert on the subject of "Architectural Composition 1" for AA 1993/94 at the Faculty of Architecture of the University of Ferrara. In addition to following the regular exercises and participate in the examining, delivered to the students of the course the following two communications entitled:

- Introduction to the problems typological: the type definitions and model transformations of the type - the first part;
- Introduction to the problems typological: the type definitions and model transformations of the type - the second part.

B.5 Collaboration teaching as expert on the subject of "Urban Morphology and building types" for AA 1994/95 and 1995/96 at the Faculty of Architecture of the University of Ferrara.

In addition to following the regular exercises and participate in the examining, delivered to the students of the course the following three communications entitled:

- Notes on the reading of the structures of urban space: building typology and urban morphology;
- The types of residence;
- The types and the modern.

B.6 Assignment of teaching his art. 100, as amended DPR382/80 for AA 1994/95, 1995/96 1996/97 1997/98 at the Faculty of Architecture of the University of Ferrara: architectural composition in the laboratory of architectural design I.

All the learning activities is documented in the special issue of the international journal of architecture "Parameter", n.223/marzo-aprile 1998, 'The School of Ferrara'. In particular the work of the Laboratory of me following were included in the article entitled "conserere ac aedificare He must cogitate diu" in parameter n. 223, March-April, 1998, pp.35-55 and in an article by Andrea Rinaldi, Muri without bricks, Urban Landscape, n.1/98, pp.102-107, and A. Boeri, F.Conato, E. Mancini, elements of technology, Pythagoras, Bologna, 1996, p. 6-7.

B.7 Collaboration to teaching as a researcher in the field of "Architectural Composition 4" course of prof. Bruno Minardi from the A. A. 1999/2000 to 2001/2002 at the Faculty of Architecture of the University of Ferrara.

B.8 Appointment of substitute teaching for the 'AA 1999/2000, 2000/2001, 2001/2002 2002/2003 2003/2004 at the Faculty of Architecture of the University of Ferrara, ARCHITECTURAL the laboratory of architectural design I.

B.9 Appointment of substitute teaching for the 'AA 2004/2005 - 2005/2006 - 2006/2007 - 2007/2008 2008/2009 2009/2010 at the Faculty of Architecture of the University of Ferrara: architectural composition in the laboratory of architectural IV.

Participant with the students of the Faculty of Architecture of Ferrara enrolled in Design Workshops of four years at the International Workshop design Villard 9, Bologna city architecture, July 9, Bologna, for presentation of projects for the area of the barracks Sani.

Participation in the exhibition of educational projects for the area north of Rovigo, "Urban Intersections", held in Rovigo October 1 to 11 carried out in the laboratories of four architectural design of the Faculty of Architecture of Ferrara, 2009

B.10 Appointment of substitute teaching for the 'AA-2010/2011 - 2011/2012 - 2012/2013 2013 2013/2014 2014/2015 2015/2016 at the Faculty of Architecture of the University of Ferrara: architectural composition in the laboratory of architectural III.

Participation in the exhibition "Urban Labor Projects", an exhibition of educational projects for a new multi-municipal center in the town of Rovigo carried out in the laboratories of three architectural design of the Faculty of Architecture of Ferrara, held in Rovigo, Museum of the Great Rivers 23:03 to 15:04 in 2011

B.11 In the A. To. 1996/97 has organized an architectural competition for students from the Design Laboratory of one year referred to as "Prize Arcab", whose theme was the design of residential houses. The competition is involved as Commissioners Prof. Franco Pure, Massimo Carmassi, Prof. Paolo Ceccarelli and Prof. Graziano Tripe. The results of this contest are published in the journal of international architecture "Parameter", n.223/marzo-aprile 1998, 'The School of Ferrara' and in an article by Andrea Rinaldi, without brick walls, in Cityscape, n .1/98, pp.102-107

B.12 Rapporteur of numerous thesis project discussed within the Faculty of Architecture of Ferrara from 1999 to present.

B.1. Master teaching, courses and activities' training

B.1.1 Rapporteur, within the post-graduate course for "Technician preservation and maintenance of historic buildings", held by Cesvip in Piacenza, on the theme "rural type classification of the Po Valley and identification of the major typological and morphological "in both 1997 and in 1998.

B.1.2 Rapporteur, within the postgraduate course "Training and guidance for architectural design in Italy," held by the Institute for Legal Studies of Economic and Social 'Gaudenzio Ferrari' in Florence, on "Methodological aspects in the elaboration of a complex project ", 1998

B.1.3 Coordinator and tutor of workshops for students of the Faculty of Architecture of Ferrara held in Granarolo Emilia (BO), for the definition of "Guidelines for the design of a sub-urban park." Speakers at the workshop as tutors: Richard Ingersoll, Antonio Angelillo, Pierluigi Molteni, Gabriele Lelli and John Del Boca. As teachers were present: Prof. Paolo Ceccarelli, Prof. Lele Mazzanti, Prof. Italo Rota, Prof. Guido Canali, Prof. Pierre Alain Croset.

The results are published in: A. Gaiani, edited by, a area, a park, an identity' Abstract Landscape Urban II. 2/200, Maggioli Publisher, Rimini.

B.1.4 Coordinator and tutor of workshops for students of the Faculty of Architecture of Ferrara held held in Bagnolo in Piano (RE) titled: "The place of the Campaign Space City". Speakers at the workshop as a tutor: Andrea Rinaldi , Pietromaria Davoli and Gabriele Lelli. As teachers were present: Prof. Graziano Tripe, Prof. Mirko Zardini and Antonio Angelillo.

The results are published in: A. Gaiani, "The plot, which is the linear matrix theme", in "The location of the Campaign and the space of the city," AA.VV., Maggioli Publisher, Rimini, 2000.

B.1.5 Rapporteur, within the post-graduate course on "Restoration and conservation of buildings and houses", held by the CSA in Pieve di Cento, on "Morphology and typology of buildings and houses of the great plain" December 1999 .

B.1.6 supervisor and tutor at the 3rd International seminar of industrial architecture, open to students of various faculties of Architecture, held at the Cultural Center Montehermoso of Vitoria-Gasteiz (Spain), with a lecture entitled "Globalization, identity, hybridization" (in English), seminar 4 to 24 September 2000, 9 September 2000 conference.

Publications about the workshop:

- AA. VV., 3rd International seminar of industrial architecture, Graficas Santamaria, Vitoria-Gasteiz, 2000

- Los arquitectos reclaman que las ruinas industriales if integren en la nueva ciudad, in "El Pais", September 12, 2000, p.42

B.1.7 curator and tutor of workshops for students of the Faculty of Architecture of Ferrara held in Guastalla (RE) titled: "Places like open systems. Strategies for change", held in May 2001. Speakers at the workshop in as tutors: arch. Pietromaria Davoli, arch. Gabriele Lelli, Arch. Andrea Rinaldi, arch. Teggi Giorgio, Sergio Zanichelli. As teachers were present: Prof. Arch Richard Ingersoll. Scientific Director of the Workshop: Prof. Arch Graziano Tripe.

Articles published on the workshop:

The design of the limit, "Guastallainforma", March 2001, Ideas in transit, "Guastallainforma," June 2001, the country changes lookcon ideas of children, "Il Resto del Carlino", May 1, 2001. Students redesign the city, "Breaking News Reggio", 1 May 2001 workshop on the city built by the children, "Journal of Reggio" 6 May 2001, a week to "design the city", in "Journal of Reggio", May 8 2001 Students redesign "their" Guastalla, in "Breaking News Reggio" May 8, 2001, City designed by the imagination, "Journal of Reggio," May 13, 2001, Mirrors Aqueduct and new relationship with the river, "Journal of Reggio "May 13, 2001, A tower in the flood plain?, in" Il Resto del Carlino ", May 13, 2001, How do you redesign the city," Breaking News Reggio ", May 13, 2001, From the students ideas and plans for redesigning the city , "the Filodiretto", May 2001

B.1.8 Professor, in the post-graduate course for "Course guides for the acquisition of skills naturalistic", held by Gal Delta 2000 in Osterley, on "Morphology and typology of buildings and houses of the lower Ferrara: how to design for their transformation, "February 2001.

B.1.9 Professor, in the post-graduate course for "Architect expert in the design and in the recovery environment", held by the Provincial School Building in Ravenna Ferrara, on "Sugar disposed of Emilia Romagna: how to design for their transformation "in October 2001.

B.1.10 Professor, in the post-graduate course for "Technician preservation and maintenance of rural historic", held by Cesvip, Piacenza, on the theme "design methods for the recovery of rural historicized" March 2002 .

B.1.11 Lecturer in the Master's degree level 2 in "Urban renewal" for "The formation of an expert in development of settlements and historical, cultural and landscape in the process of urban regeneration.", Taking dall'OIKOS, dell'Abitare Training Center, in Ferrara, on the theme "Project of public spaces in open configurations" in March 2002.

B.1.12 Professor in the PhD in Industrial Design and Multimedia Communication at the Polytechnic of Milan from 2001 to 2002, in "Communicating research" on the theme "Communicating research of public bodies" in November 2002.

B.1.13 Teacher in the Training Level III, AA 2001-2002, Politecnico di Torino, "Cartography and Architecture project" in June 2002.

B.1.14 Lecturer in International Workshop held in Ferrara (Fe) titled: "Urban Renewal. Consortium Symposium - European Social Fund 2002-0010/SC3 PA. Design made in agreement between the Faculty of Architecture of Ferrara and Oikos Centre for the Study of living ", held in July of 2002. Training Module: Laboratory design of public spaces

The workshop will take place in a coordinated manner with the design of complex areas (prof. Farinella) and will address issues of urban design theory and technique applied to public spaces.

B.1.15 curator and tutor of the international workshop for students of the Faculty of Architecture of

Ferrara, held in Ferrara (Fe) titled: "Living the desires", held in April 2006. Speakers at the workshop as a tutor: arch . Manuel Gausa

The results are published in: A. Gaiani, the Living Wish, composers Editrice, Bologna

B.1.16 Visiting Professor at the Moscow Architectural Institute with a course in Architectural Design with Prof. Serguei Brovchenko 2004_2005

B.1.17 Participant with the students of the Faculty of Architecture of Ferrara enrolled in Design Workshops of 3 and 4 years at the International Workshop design Villard 9, Bologna city architecture, July 9, Bologna, for the presentation of projects' area of the barracks Sani performed by the students of the Faculty with Antonello Stella, 2008

B.1.18 Lecturer in the Master's Degree in "conservation, management and enhancement of the industry", with a communication on "Sugar Emilia Romagna: knowledge, appreciation and reuse", held in Ferrara November 7, 2008

B.1.19 Lecturer in the Italian section of the University of Texas at Austin with a report entitled "New potentialities for the redevelopment of productive areas _ objects _ lost identity in transition", held in Arezzo April 26, 2009

B.1.20 Participant as tutors with students of the Faculty of Architecture of Ferrara enrolled in the Design Workshops Design Workshop "The future of the built environment", held at the Fiera di Bologna, Saienergia October 21 to 31, The design and exhibition of planning results have been taken on the case-study district Boat INA HOUSE, Bologna, 2009

The results are published in: Enrico Arbizzani, John Avosani, Marta Calzolari, Luke Magarotto, Cristina Vanucci Urban regeneration, functional and energy-environment of the neighborhood boat Bologna. CITYSCAPE pp.VI-XIII Vol.4, 2010

B.1.21 Lesson in Rome at the Master's Level "Housing: New ways of living between innovation and transformation" organized by the Department of Design and Study of the Faculty of Architecture of Rome 3. The title of the communication is "The projects of the FHS innovation design and construction," held April 1, 2011

B.1.22 Participant as tutors with students of the Faculty of Architecture of Ferrara enrolled in the Design Workshops Design Workshop What (we) ty Redesign and energy efficiency for sustainable quality of life, regeneration project of the former Agricultural Consortium and Mapre of Reggio Emilia, organized by magazine Ofarch The future of the built environment, held in Milan in October 2012 MADE expo

B.1.23 Scientific manager and lecturer of the post-graduate course in sustainable urban planning techniques and methodologies, post-earthquake reconstruction developments and scenarios.

Teacher of the module Architectural and urban planning 120 hours

Promoter subjects

Department of Architecture, University of Ferrara

Architecture Research Center> Energy.

CITER - Urban and territorial planning laboratory

LaboRA - Architectural Restoration Laboratory

Provincial Training Consortium Ferrara, responsible Dr. Norma Bellini General Manager.

Academic Year, 2013-2014

B.1.23 Lecturer within the Materia Paesaggio course, The landscape of reconstruction between plan and project. Looks and projects for the rural landscape, organized by the Emilia Romagna Region. The

title of communication: The innovative and sustainable architectural project for the construction containers, June 2014 Ravenna

B.1.24 Lecturer at the course The founding elements of the regeneration project in rural houses in the Emilia plains in rural settlements in Terra d'Argine, with a communication entitled: Knowing to plan the regeneration and conservation of the rural heritage, Novi di Modena, September 2015

B.1.25 Lecturer at the BIM course between project and construction, Project theoretical approach for the development of a Social Housing project, Saie Accademy, October 2015

B.1.26 Lecturer in the course Sustainable construction technologies: dry systems, with a communication entitled: The architectural project and the wooden construction, Bari November 2015

B.1.27 Deputy assignment of the Architectural Composition course III (90 hours), a discipline that characterizes the Architectural Design Laboratory III B, third year, first semester, a.a. 2016-17

B.1.29 Visiting Professor Beyond the Boundary international design workshop, Ex Banci and Declassata. A new Development opportunity for Prato. Prato, July 2017

B.2 Activities 'Internal Organization and tasks at the Faculty' / Department of Architecture of Ferrara

B.2.1 Teaching Committee from 2002al 2006 and from 2008 to 2011 as secretary

B.2.2 Commission 2002al credits from 2006 and from 2008 to 2011 as secretary

B.2.3 Commission Steering Committee from 2002al 2007 as a secretary

B.2.4 Commission library from1 999-14 ICAR area being representative

B.2.5 Group Self-Assessment 2002 - in progress, as a representative area ICAR 14

B.2.6 member delegated by the faculty to international relations and projects erasmus 2007 to 2011

B.2.7 Commission international mobility as a member

B.2.8 Self-assessment group. Responsible / referent Quality Assurance of the CdS, from 2011 to 2015

B.2.9 Lecturer of the Cds Review report Architecture from 2014 in progress

B.2.10 Preparation of documents as part of the review group, operative teacher. for the Audition of Expert Evaluators Commission (CEV) ANVUR, held in November 2016

B.2.11Membrane ADDRESS COMMITTEE as Researchers Representative, Cds Architecture

C. ACTIVITIES 'SCIENTIFIC AND RESEARCH

Coordination and participation in research pre 2002

C.1 (since 1990) Experience in the design of urban consolidation: the case of the Netherlands

The research has resulted in publications:

- The Dutch experience, to renew the tradition, in the book, various authors, "Designing the urban fabric", Alinea, Florence, 1993, p. 275-340, where they are exposed projects for the experience taken as case studies aimed at the design in the urban fabric already established;

-A. Gaiani, "Trends in contemporary architecture in the Netherlands", in the book Guide to contemporary architecture in Amsterdam, Maggioli, Rimini, 1997.

- A. Gaiani, "Amsterdam, between innovation and tradition," in the book Guide to contemporary architecture in Amsterdam, Maggioli, Rimini, 1997.
- Collaboration in research "Designing in construction" (MURST 40% Prof. Architect Mario Zaffagnini). The first results were published in:
 - The Dutch experience: Renew with tradition, AA.VV., "Designing the urban fabric", Alinea, Florence, 1993, p. 275-340;
 - Cité de la Musique in Christian de Portzamparc, in "Urban Quality in Europe," Ente Fiere, Bologna, 1993, p. 381-395

C.2 (since 1990) Design of specialized spaces: stop, exchange and garages, Bibliotechee.

These types of studies have focused on the problems of mobility in urban and stop and for the design of libraries, addressing the entire design process.

- A. Gaiani, Bologna. Linear system of parking facilities integrated with sliding axis along the boulevards, in "Cityscape" n. 2, Bologna, March 1990, p. 26-34;
- A. Gaiani, G. Giampietro, Woonerf, the revenge of the pedestrian, in "Cityscape" n. 2, Bologna, March 1990, p. 76-83;
- A. Gaiani, The City of the goods, "Urban Landscape" n. 3-4, Bologna, May 1992, pp. 78-84;
- A. Gaiani, Study for a linear system with integrated parking axis of sliding along the boulevards in Bologna "Architesi", Bologna, 1992, p. 138-142;
- A. Gaiani, garages, AA.VV., Handbook of building design, Hoepli, Milan, 1992, p. 1777-1810;
- A. Gaiani, technical and regulatory aspects of parking, in A. Gaiani, M. Ghirardelli, M. Zaffagnini, "parking place as urban", Maggioli, Rimini, 1993, p. 31-80, 90-102.

C.3 (since 1990) Design of specialized buildings: libraries.

- A. Gaiani, Libraries, AA.VV., Handbook of building design, Hoepli, Milan, 1992, p. 957-1005;
- Assignment of research of the Department of Process and Methods of Production and Construction within the study: Addresses and tools for the definition of a project guide for building library in the Basilicata region. In particular, the collaboration involved the participation in the working group and drafting, within the final reports of research of Chapters 2, 3 and 4 (Environmental Design and Technology) and 6 (Application Example). This research report is currently being corrected to be given to the press.

C.4 Methodologies for conducting morphological and typological

The research has resulted in publications:

- A. Gaiani, Introduction to type in AA.VV., "architecture on a human scale", Pythagoras, Bologna, 1994, p. 123-163
- A. Gaiani, Notes on the reading of the structures of the urban space, in A. Gaiani, N. Marzot, M. Zaffagnini, "Urban morphology and building typology", Pythagoras, Bologna, 1995, p. 148-235.

C.5 (since 2002) Convention on the search for a Model Application of the PROJECT PEGASUS, Province of Bologna-Emilia Romagna, entitled "Guidelines for the development of areas of natural and environmental value of rural areas through mitigation Impact environmental landscape service facilities of agricultural activities ", Research Director Alessandro Gaiani, scientific coordinator Michele Ronconi

C.6 (since 2002) Convention of research under the LIFE Nature project "Restoration ecology and conservation of the site in Salina SCI Comacchio. Methodology for recovery of these buildings, "Consortium Regional Park of the Po Delta, Research Director Alessandro Gaiani, scientific coordinator Michele Ronconi

C.7 Construction rural plains of Emilia-Romagna.

The research has resulted in publications:

. Gaiani, State of the art on typological studies of the rural house of the plain of Bologna, in "Urban Landscape" n. 1/95, Bologna, p. 41-51;

- A. Gaiani, typological and morphological characters of rural settlements in the plain of Emilia, in "Building Bricks" n. 47/95, Milan, pp. 332-343;

- A. Gaiani, rural housing types in the plain of Emilia-Romagna, in AA.VV., "The house of the great plain," Alinea, Florence, 1997, p. 170-233.

Research collaboration "Building rural plains of Bologna as historical memory of the landscape" (MURST 60% Prof. Architect Mario Zaffagnini) 1993-1994 and 1994-1995. The first results of the research were published in:

-State of the art on typological studies of the rural house of the plain of Bologna, in "Urban Landscape" n. 1/95, Bologna, p. 41-51.

- Typological and morphological characters of rural settlements in the plain of Emilia, in "Building Bricks", n. 47/1995, Milan, 332-343.

• Collaboration in research "Building rural plains of Bologna as historical memory of the landscape" (MURST 60% Prof. Architect Mario Zaffagnini) 1995-1996. The results of the research are to be published in:

-Types of the lodging in the Emilia-Romagna plain, AA.VV., "The house of the great plain," Alinea, Florence, 1997, p. 170-233.

C.8 A. Gaiani, scientific coordinator, Handbook of reuse and exploitation of building and landscape of the Delta. ", (Ref. Action 6 - Local Action Plan (Gal) Leader II 1994-1999 Basso Ferrarese - Delta 2000), Head of Technical and Scientific: Prof. Graziano Tripe

Working Group:

Rural housing and manuals: arch. Nicola Marzot collaborator arch. David Bisco

History and geography of rural Lower Ferrarese: arch. Pier Giorgio Massaretti

Typological classification criteria and modification: arch. Alessandro Gaiani collaborator arch. Michele Ronconi

Technologies for recovery of rural arch. Theo Zaffagnini collaborator Natasha Franzoni

Legal framework: arch. Michele Ghirardelli collaborator arch. Mirna Schincaglia

The architecture students of Ferrara visiting the Macrolotto Zero
Professor Gaiani: "An area that undoubtedly has its own cultural, architectural and social identity from which to eliminate the incongruous elements to create regeneration mechanisms on the urban area."
This morning about 100 students of the University of Ferrara found themselves in the square delle Carceri, led by the professor of the architectural department Marcello Marchesini and the head of the courses Alessandro Gaiani, to visit the historic center of the city and make an inspection of the Macrolotto zero. "The area we visited - said Professor Gaiani - without a doubt its cultural, architectural and social identity. Certainly presents difficulties, for example we have noticed that there are no public spaces or connection and this will be the basis from which the children will start in the realization of their projects. Our idea is to eliminate the incongruous elements found there to create regeneration mechanisms on the urban area. "Since September, at the beginning of the school year, the design courses for the third year of the architecture department of University of Ferrara are focused on Prato and in particular on the Macrolotto zero with the birth of specific ideas and projects.
