ORCID 0000-0002-2874-9588

Gender F | Date of birth April 3, 1991 | Nationality Italian

RESEARCH EXPERIENCE

01/07/2025 – present — Assistant Professor (Ricercatore Tenure Track, RTT)

At: Department of Environmental and Prevention Sciences, University of Ferrara, Italy

Research topics: Development of numerical methods for hyperbolic balance laws with relaxation terms and multiscale problems, with particular interest in applications in the field of bio-mathematics.

Scientific Disciplinary Area: Numerical analysis (MATH-05/A)

01/07/2022 – 30/06/2025 — Assistant Professor (Ricercatore a Tempo Determinato di tipo a, RTDa)

At: Department of Environmental and Prevention Sciences, University of Ferrara, Italy

Research topics: Development of Finite Volume Methods, Monte Carlo-type schemes, Physics-Informed Neural Networks, and Uncertainty Quantification techniques for hyperbolic balance laws with relaxation terms and multiscale problems, with particular interest in applications in the field of bio-mathematics.

Scientific Disciplinary Area: Numerical analysis (MATH-05/A)

01/10/2021 – 30/06/2022 — Post-doc research fellow of Istituto Nazionale di Alta Matematica “Francesco Severi”

At: Department of Mathematics and Computer Science, University of Ferrara, Italy

Research advisor: Prof. Lorenzo Pareschi

Research project title: *Uncertainty quantification for hyperbolic balance laws on networks*

Research topics: Development of uncertainty quantification and Monte Carlo-type particle methods for hyperbolic balance laws; development of asymptotic-preserving physics-informed neural networks for multiscale problems

Scientific Disciplinary Area: Numerical analysis (MATH-05/A)

01/11/2020 – 30/09/2021 — Post-doc research fellow of University of Ferrara

At: Department of Mathematics and Computer Science, University of Ferrara, Italy

Research advisor: Prof. Lorenzo Pareschi

Research project title: *IMEX Runge-Kutta methods for hyperbolic systems for fluid-structure interaction in blood flow and uncertainty quantification*

Research topics: Development of uncertainty quantification methods for hyperbolic balance laws structured on networks, with particular interest in applications in the areas of socio-epidemic modeling

Scientific Disciplinary Area: Numerical analysis (MATH-05/A)

01/11/2019 – 31/10/2020 — Post-doc research fellow of University of Ferrara

At: Department of Mathematics and Computer Science, University of Ferrara, Italy

Research advisor: Prof. Lorenzo Pareschi

Research project title: *IMEX Runge-Kutta methods for hyperbolic systems for fluid-structure interaction in blood flow*

Research topics: Development of uncertainty quantification methods for hyperbolic balance laws structured on networks, with particular interest in applications of cardiovascular modeling and bio-mathematics

Scientific Disciplinary Area: Numerical analysis (MATH-05/A)

VISITING RESEARCH STAYS

13/05/2025 – 18/05/2025 Research visiting period at UniZar

At: Department of Materials and Fluids Science and Technology, University of Zaragoza, Spain

Research topic: Development of IMEX schemes for physics-based wildfire propagation models

Local host: Prof. Adrián Navas-Montilla

08/07/2024 – 14/07/2024 Research visiting period at CUHK

At: Department of Mathematics, The Chinese University of Hong Kong, Shatin, N.T., Hong Kong

Research topic: Development of uncertainty quantification methods for kinetic equations

Local host: Prof. Liu Liu

13/09/2021 – 15/11/2021 Research visiting period at NYU

At: Courant Institute of Mathematical Sciences, New York University, U.S.A.

Research topic: Development of Monte Carlo-type particle methods for systems of hyperbolic equations with relaxation terms

Local research advisor: Prof. Russel E. Caflisch

18/01/2019 – 31/05/2019 Ph.D. visiting period at UniZar

At: Department of Materials and Fluids Science and Technology, University of Zaragoza, Spain

Research topic: Development of computational models of fluid dynamics characterizing aspects of elastic and viscoelastic fluid-structure interaction applied to blood flow equations

Local supervisors: Prof. Javier Murillo and Prof. Pilar García Navarro

EDUCATION

01/11/2016 – 31/10/2019 Ph.D. in Engineering Science

At: Department of Engineering, University of Ferrara, Italy

Thesis title: *1D augmented fluid-structure interaction systems with viscoelasticity: from water pipelines to blood vessels*

PhD supervisors: Prof. Alessandro Valiani and Prof. Valerio Caleffi

Final result: Ph.D. title approved cum laude with the additional title of *Doctor Europaeus*

Thesis defense: March 19, 2020

09/2013 – 17/12/2015 Master in Civil Engineering

At: Department of Engineering, University of Ferrara, Italy

Erasmus exchange period: From February to July 2014 at Instituto Superior Técnico (IST), Lisbon, Portugal

Thesis title: *Analisi computazionale del risalto idraulico diretto e ondulato (Computational analysis of the direct and undular hydraulic jump)*

Final grade: 110/110 cum laude and special mention

09/2010 – 09/10/2013 Bachelor in Civil and Environmental Engineering

At: Department of Engineering, University of Ferrara, Italy

Thesis title: *Criteri di analisi di strutture murarie lesionate per la definizione delle modalitá di intervento (Analysis criteria of damaged masonry structures for the definition of intervention methods)*

Final grade: 110/110 cum laude

TEACHING EXPERIENCE IN UNIVERSITY COURSES

A.Y. 2023/2024, 2024/2025, 2025/2026

Doctoral Course Lecturer

At: Department of Mathematics and Computer Science, University of Ferrara, Italy

Course: *An introduction to uncertainty quantification for PDEs*, Doctoral course in mathematics of the Universities of Ferrara, Modena-Reggio Emilia and Parma (lecturer for 6h, 1.5 ECTS)

A.Y. 2024/2025, 2025/2026

Master Course Lecturer

At: Department of Architecture, University of Ferrara, Italy

Course: *Applied Mathematics*, Master Degree in Architecture (50h, 5 ECTS)

A.Y. 2023/2024, 2024/2025, 2025/2026

Bachelor Course Lecturer

At: Department of Environmental and Prevention Sciences, University of Ferrara, Italy

Course: *Mathematics*, Bachelor Degree in Biological Sciences (24h, 3 ECTS)

A.Y. 2023/2024

Master Course Lecturer

At: Department of Architecture, University of Ferrara, Italy

Course: *Applied Mathematics*, Master Degree in Architecture (40h, 4 ECTS)

A.Y. 2022/2023

Master Course Lecturer

At: Department of Architecture, University of Ferrara, Italy

Course: *Exercises in Applied Mathematics*, Master Degree in Architecture (30h, 3 ECTS)

A.Y. 2022/2023

Bachelor Course Lecturer

At: Department of Environmental and Prevention Sciences, University of Ferrara, Italy

Course: *Mathematics*, Bachelor Degree in Biological Sciences (16h, 2 ECTS)

A.Y. 2021/2022

Doctoral Course Lecturer

At: Department of Mathematics and Computer Science, University of Ferrara, Italy

Course: *An introduction to uncertainty quantification for PDEs*, Doctoral course in mathematics of the Universities of Ferrara, Modena-Reggio Emilia and Parma (lecturer for 4h, 1 ECTS)

A.Y. 2021/2022

Contract Professor

At: Department of Architecture, University of Ferrara, Italy

Course: *Exercises in Applied Mathematics*, Master Degree in Architecture (30h, 3 ECTS)

A.Y. 2020/2021

Contract Professor

At: Department of Architecture, University of Ferrara, Italy

Course: *Exercises in Applied Mathematics*, Master Degree in Architecture (30h, 3 ECTS)

OTHER TEACHING ACTIVITIES

03/2022 – 04/2022

Lecture series speaker

At: Department of Mathematics and Computer Science, University of Ferrara, Italy

Lecture series: Laboratory of *Mathematical modeling of socio-epidemic dynamics* organized in the context of the Scientific Degree Plan (Piano Lauree Scientifiche, PLS) with Liceo Scientifico A. Roiti of Ferrara (12h)

© European Union, 2002 – 2026 | https://europass.cedefop.europa.eu

04/2021 – 05/2021

Lecture series speaker

At: Department of Mathematics and Computer Science, University of Ferrara, Italy

Lecture series: Laboratory of *Socio-epidemic dynamics* organized in the context of the Scientific Degree Plan (Piano Lauree Scientifiche, PLS) with Liceo Scientifico A. Roiti of Ferrara (11.5h)

HONORS AND AWARDS

March 2025 — Winner of the *SIMAI "Fausto Saleri" Prize*. Awarded by the Italian Society of Applied and Industrial Mathematics (SIMAI) during the 2025 edition of the bi-annual Congress of the Society (September 1–5, 2025, Trieste, Italy).

January 2025 — Nomination as member of the European Mathematical Society Young Academy (EMYA) for the years 2025-2028.

March 2023 — Winner of a financial support (covering registration fee) for participating to the 10th International Congress on Industrial and Applied Mathematics (ICIAM 2023), held at Waseda University, Tokyo, Japan. Awarded by the Congress Committee.

July 2021 — Winner of the *11th ECCOMAS PhD Olympiad* for the best PhD Thesis presentation. Awarded by the European Community on Computational Methods in Applied Sciences (ECCOMAS) during the VI ECCOMAS Young Investigators Conference (July 7–9, 2021, Universitat Politècnica de València, Spain).

March 2021 — Finalist for the *ECCOMAS PhD Award 2020* as a nominee of the Italian Association of Theoretical and Applied Mechanics (AIMETA).

March 2021 — Winner of the *GIMC 2020 Award* for the Best Doctoral Thesis in Computational Fluid Mechanics. Awarded by the Italian Group of Computational Mechanics (GIMC) of the Italian Association of Theoretical and Applied Mechanics (AIMETA).

SCIENTIFIC QUALIFICATIONS

National Scientific qualification (ASN) — National Scientific qualification as Associate Professor in the Italian higher education system, in the call 2021/2023 for the disciplinary field of 01/A5 - Numerical Analysis.

PhD Thesis

36. **Bertaglia G.** 1D augmented fluid-structure interaction systems with viscoelasticity: from water pipelines to blood vessels. Department of Engineering, University of Ferrara, 2020.

INVITED LECTURES AND TALKS

Conferences and Workshops

21/09/2026 – 25/09/2026 Invited speaker at the *DataHyking Closing Conference*, Rome, Italy.
Title of the talk: *Multi-Order Monte Carlo Methods for Uncertainty Quantification in Multiscale PDEs*.

07/09/2026 – 11/09/2026 Invited speaker at the Conference *A Journey Across Kinetic Theory and Numerical Methods*, Ferrara, Italy.
Title of the talk: *Beyond standard Monte Carlo: Gradient-based methods for hyperbolic conservation laws*.

15/12/2025 – 16/12/2025 Invited speaker at the Workshop *ADAMUS (ADvanced numerical Approaches for MUltiscale Systems with uncertainties) kick-off meeting*, Ferrara, Italy.
Title of the talk: *A Multi-Order Monte Carlo framework based on IMEX Runge–Kutta hierarchies*.

22/09/2025 – 25/09/2025 Invited speaker at the Workshop *Optimal Control and Agent Systems*, University of Rome "La Sapienza", Italy.
Title of the talk: *Learning and controlling PDEs under limited data via Physics-Informed Neural Networks*.

08/09/2025 – 12/09/2025 Invited speaker at the Workshop *HIKE-LABS: High-dImensional Kinetic modEling, Learning and control of Agent-Based Systems*, Alba di Canazei, Italy.
Title of the talk: *Multi-Order Monte Carlo methods for quantifying uncertainty by exploiting IMEX Runge-Kutta hierarchies*.

01/09/2025 – 05/09/2025 Plenary Lecturer as recipient of the 2025 SIMAI "Fausto Saleri" Prize at the 2025 edition of the bi-annual *Congress of the Italian Society of Applied and Industrial Mathematics* (SIMAI 2025), Trieste, Italy.
Title of the talk: *Handling Uncertainty: Recent Perspectives in Uncertainty Quantification Methods for Differential Equations*

17/03/2025 – 20/03/2025 Invited speaker at the *3C Conference: Challenges in Computational methods for Complex environmental applications*, Université Savoie Mont Blanc, Chambéry, France.
Title of the talk: *Gradient-Based Monte Carlo Methods for Hyperbolic Systems*.

19/02/2025 – 21/02/2025 Invited speaker at the *Workshop "Mathematical and Numerical Challenges in Ecology and Biology"* organized by the Department of Mathematics of the the University of Bari, Italy.
Title of the talk: *Modeling the spread of infectious diseases on networks through multiscale systems*.

11/07/2024 – 12/07/2024 Invited speaker at the *Workshop on Scientific Computing and Data Science* organized by the Department of Mathematics of the The Chinese University of Hong Kong, China.
Title of the talk: *Gradient-based Monte Carlo methods for hyperbolic equations*.

19/02/2024 – 23/02/2024 Invited speaker at the INdAM Workshop INSiDEs, *Innovations in the Numerical Treatment of Stiff Differential Equations*, University of Rome "La Sapienza", Italy.

© European Union, 2002 – 2026 | https://europass.cedefop.europa.eu

Title of the talk: *Multiscale computational modeling of blood flow with asymptotic-preserving schemes*.

14/02/2024 – 16/02/2024 Invited speaker at the bi-annual GNCS Conference, Rimini, Italy.

Title of the talk: *Asymptotic-preserving methods for multiscale blood flow modeling*.

29/09/2022 – 30/09/2022 Young Plenary Lecturer at the GIMC SIMAI YOUNG 2022 Workshop, University of Pavia, Italy.

Title of the talk: *Uncertainty quantification methods for PDEs with applications to biomathematics*.

13/06/2022 – 17/06/2022 Invited speaker at Workshop 5 on "UQ in kinetic and transport equations and in high-frequency wave propagation" of the Thematic Programme on *Computational Uncertainty Quantification: Mathematical Foundations, Methodology & Data*, Erwin Schrödinger International Institute for Mathematics and Physics (ESI), University of Vienna, Austria.

Title of the talk: *Uncertainty quantification of the spatial spread of epidemics described through kinetic models*.

15/12/2021 – 17/12/2021 Invited speaker at the *Numerical aspects of hyperbolic balance laws and related problems – Young Researchers Conference*, Department of Computer Science, University of Verona, Italy.

Title of the talk: *Hyperbolic models for the spatial spread of infectious diseases under uncertain data: kinetic description and numerical methods*.

08/06/2021 Invited speaker at the online workshop "Giovani alla Ricerca" organized by the Italian Association of Theoretical and Applied Mechanics (AIMETA).

Title of the talk: *1D augmented fluid-structure interaction systems with viscoelasticity: from water pipelines to blood vessels*.

Seminars

29/04/2025 Lecture series "Numerical Differential Modelling Seminars" organized by the Department of Mathematics, University of Rome "La Sapienza", Italy.

Title of the seminar: *Gradient-based Monte Carlo methods for hyperbolic conservation laws*.

09/03/2022 Lecture series "Young Researcher Seminars, Maths Applications & Models" organized by the Department of Computer Science, University of Verona, Italy.

Title of the seminar: *How to quantify the uncertainty that rules the world*.

07/12/2021 Lecture series organized by the Numerical Analysis group of the University of Iowa, U.S.A.

Title of the seminar: *Recent advances on mathematical and numerical modeling of the spatial spread of epidemics under uncertainty*.

21/10/2021 Lecture series organized by the Research and Training Group in Mathematical Modeling and Simulation of the Courant Institute of Mathematical Sciences, New York University, U.S.A.

Title of the seminar: *Hyperbolic models for the spatial spread of epidemics: Kinetic description, data uncertainty, and numerical approach*.

27/05/2021 Lecture series "Advances in Socio-Epidemic Mathematical Modelling" organized by the Socio-Epidemic Modeling group (MSE) of the Italian Mathematics Union (UMI).

Title of the seminar: *The need to model the spatial spread of epidemics on networks under uncertain data*.

26/04/2019 Lecture series organized by the Computational Hydraulics group of the University of Zaragoza, Spain.

Title of the seminar: *The augmented FSI system for blood flow in viscoelastic vessels*.

© European Union, 2002 – 2026 | https://europass.cedefop.europa.eu

22/02/2019 Lecture series organized by the Computational Hydraulics group of the University of Zaragoza, Spain.

Title of the seminar: *Modeling FSI damping effects in viscoelastic pipes with hydraulic transients*.

TALKS IN CONFERENCES AND WORKSHOPS

15/06/2025 – 18/06/2025 *6th International Conference on Uncertainty Quantification in Computational Science and Engineering* (UNCECOMP 2025), Rhodes, Greece.

Invited talk in Minisymposium: "Multi-Order Monte Carlo approach leveraging hierarchies of IMEX Runge-Kutta schemes" (Minisymposium *Monte Carlo Sampling for Stochastic Solvers: Advances in Uncertainty Quantification*).

17/03/2025 – 20/03/2025 *23rd IACM Computational Fluids Conference* (CFC 2025), Santiago de Chile, Chile.

Invited talk in Minisymposium: "A multiscale framework for modeling blood flow in the cardiovascular system" (Minisymposium *The human circulation and associated diseases: models, methods and simulations*).

15/07/2024 – 19/07/2024 *International Conference on Scientific Computation and Differential Equations* (SciCADE 2024), National University of Singapore, Singapore.

Invited talk in Minisymposium: "Kinetic modeling of infectious viral dynamics based on mutual utility functions" (Minisymposium *Analysis and Numerical Computations for Kinetic Models*).

11/04/2024 – 12/04/2024 Kick-off Meeting of the PRIN 2022 PNRR project *Data-driven discovery and control of multiscale interacting artificial agent systems*, Verona, Italy.

Contributed talk: "Asymptotic-Preserving Neural Networks for Multiscale Problems" .

27/02/2024 – 01/03/2024 *SIAM Conference on Uncertainty Quantification* (SIAM UQ24), Trieste, Italy.

Invited talk in Minisymposium: "Stochastic Asymptotic-Preserving Bi-fidelity Method for Multiscale Spread of Epidemics Under Uncertainty" (Minisymposium *Multilevel and Asymptotic-Preserving Methods for Uncertainty Quantification in Multiscale Systems*).

11/09/2023 – 15/09/2023 *21^{st} IMACS (International Association for Mathematics and Computers in Simulation) World Congress* (IMACS2023), Rome, Italy.

Invited talk in Minisymposium: "Multiscale Constitutive Framework of Blood Flow: Modeling and Numerics" (Minisymposium *Recent trends in numerical methods for evolutionary problems*).

28/08/2023 – 01/09/2023 2023 edition of the bi-annual *Congress of the Italian Society of Applied and Industrial Mathematics* (SIMAI 2023), Matera, Italy.

Invited talks in Minisymposia: "A multiscale constitutive framework of computational blood flow modeling" (Minisymposium *Models and methods for biomedical applications*);
"Solving inverse and forward problems of multiscale epidemic spread with neural networks" (Minisymposium *Recent Advances on the mathematical and numerical modeling of epidemics*).

20/08/2023 – 25/08/2023 *10^{th} International Congress on Industrial and Applied Mathematics* (ICIAM 2023), Tokyo, Japan.

Invited talk in Minisymposium: "Asymptotic-preserving neural networks for kinetic equations in socio-epidemics" (Minisymposium *Many-agent systems and mean-field models for socio-economic and life sciences dynamics*).

26/06/2023 – 30/06/2023 *22^{nd} ECMI (European Consortium for Mathematics in Industry) Conference on Industrial and Applied Mathematics* (ECMI2023), Wroclaw, Poland.

Invited talk in Minisymposium: "Solving multiscale problems with neural networks: the importance of asymptotic-preservation" (Minisymposium *Neural network-based numerical solution of ODEs and PDEs*).

© European Union, 2002 – 2026 | https://europass.cedefop.europa.eu

19/06/2023 – 21/06/2023 *7th ECCOMAS Young Investigators Conference* (YIC2023), Porto, Portugal.

Invited talk in Minisymposium: "A bi-fidelity collocation approach for kinetic epidemic models with random inputs" (Minisymposium *Uncertainty quantification of differential equations with random parameters: methods and applications*).

22/05/2023 – 26/05/2023 *Sharing High-order Advanced Research Know-how on Finite Volume Conference* (SHARK-FV 2023), Minho, Portugal.

Contributed talk: "Computational blood flow modeling: A multiscale constitutive framework".

18/05/2023 – 19/05/2023 *Workshop MSE (Modellistica Socio-Epidemiologica)*, Complesso Monumentale Sant'Anna dei Lombardi, Napoli, Italy.

Contributed talk: "Asymptotic-Preserving Neural Networks for inverse and forward problems in multiscale epidemic dynamics".

24/11/2022 – 26/11/2022 *Matematica per l'Intelligenza Artificiale e il Machine Learning - Giovani Ricercatori*, Politecnico di Torino, Italy.

Contributed talk: "Asymptotic-Preserving Neural Networks for multiscale hyperbolic models".

29/09/2022 – 30/09/2022 *GIMC SIMAI YOUNG 2022 Workshop*, University of Pavia, Italy.

Invited talk in Minisymposium: "On mathematical models and methods for 1D fluid-structure interaction problems in computational hemodynamics" (Minisymposium *Mechanics of Biological Systems: Models and Experiments*).

28/06/2022 – 29/06/2022 *7th International Conference on Computational and Mathematical Biomedical Engineering – CMBE2022*, Politecnico di Milano, Italy.

Invited talk in Minisymposium: "The value of viscoelasticity in computational hemodynamics: Uncertainty quantification and comparison with in-vivo data" (Minisymposium *Computational modeling and simulation of cardiovascular physiology*).

20/06/2022 – 24/06/2022 *XVIII International Conference on Hyperbolic Problems: Theory, Numerics, Applications* (HYP2022), University of Málaga, Spain

Contributed talk: "Asymptotic-preserving neural networks for hyperbolic transport models: Application to epidemic dynamics".

05/06/2022 – 09/06/2022 *8th European Congress on Computational Methods in Applied Sciences and Engineering, ECCOMAS Congress 2022*, Oslo, Norway.

Invited talk in Minisymposium: "Multiscale kinetic transport models for the spread of epidemics with uncertain data" (Minisymposium *Mathematical and numerical modelling of COVID-19 epidemic*).

11/05/2022 – 13/05/2022 *Efficient high-order time discretization methods for PDEs*, Villa Orlandi, Anacapri (NA), Italy.

Contributed talk: "Physics-informed neural networks for multiscale hyperbolic models for the spatial spread of infectious diseases".

04/04/2022 – 08/04/2022 *European Workshop on High Order Numerical Methods for Evolutionary PDEs: Theory and Applications* (HONOM 2022), Vila Galé, Braga, Portugal.

Contributed talk: "Physics-Informed Neural Networks for multiscale hyperbolic systems: Application to epidemic dynamics".

30/08/2021 – 03/09/2021 *SIMAI 2020+21, XV biannual Congress of SIMAI (Italian Society of Applied and Industrial Mathematics)*, University of Parma, Italy.

Invited talk in Minisymposium: "Stochastic hyperbolic transport models for the spatial propagation of infectious diseases on networks" (Minisymposium *Novel approaches in the mathematical understanding of COVID-19 epidemic*).

© European Union, 2002 – 2026 | https://europass.cedefop.europa.eu

26/07/2021 – 30/07/2021 *Numerical methods for hyperbolic problems* (NUMHYP 2021), Depaetment of Civil, Environmental and Mechanical Engineering, University of Trento, Italy.

Contributed talk: "Stochastic asymptotic-preserving IMEX Finite Volume methods for viscoelastic models of blood flow".

07/07/2021 – 09/07/2021 *VI ECCOMAS Young Investigators Conference*, online conference originally scheduled at Universitat Politècnica de València, Spain.

Invited talk in Minisymposium: "Augmented fluid-structure interaction systems for viscoelastic pipelines and blood vessels" (Minisymposium *PhD Olympiads*).

14/06/2021 – 16/06/2021 *XXXVII Convegno Nazionale di Idraulica e Costruzioni Idrauliche*, online edition.

Contributed talk: "Modellazione del flusso sanguigno con sistema a-FSI: stima dei parametri e validazione in-vivo".

01/03/2021 – 05/03/2021 *2021 SIAM Conference on Computational Science and Engineering*, online conference originally scheduled in Fort Worth, Texas, U.S.A.

Invited talk in Minisymposium: "A stochastic AP-scheme for non-conservative blood flow models with uncertainties" (Minisymposium *Shallow water flows: moment models, numerical schemes and applications*).

08/05/2019 – 10/05/2019 *Efficient high-order time discretization methods for PDEs*, Villa Orlandi, Anacapri (NA), Italy.

Contributed talk: "The augmented FSI system for blood flow in viscoelastic vessels solved with IMEX schemes".

01/04/2019 – 05/04/2019 *European Workshop on High Order Numerical Methods for Evolutionary PDEs: Theory and Applications* (HONOM 2019), Escuela Técnica Superior de Ingenieros de Minas y Energía, Universidad Politécnica de Madrid, Spain.

Contributed talk: "Accuracy-preserving IMEX schemes applied to the augmented FSI system for blood flow in viscoelastic vessels".

12/09/2018 – 14/09/2018 *XXXVI Convegno Nazionale di Idraulica e Costruzioni Idrauliche*, Universitá Politecnica delle Marche, Ancona, Italy.

Contributed talk: "Modelli numerici per lo studio di fenomeni transitori idraulici in condotte viscoelastiche".

12/06/2018 – 14/06/2018 5^{th} IAHR Europe Congress, *New challenges in hydraulic research and engineering*, University of Trento, Italy.

Contributed talks: "The augmented FSI system for blood flow in compliant vessels";
"A comparison of numerical methods for compressible flows in viscoelastic pipes".

SCIENTIFIC RESPONSIBILITY OF FUNDS AND RESEARCH PROJECTS

Competitive calls

2024 – 2025 "Bando Giovani anno 2024 (finanziato con il contributo 5x1000 dell'anno 2022)", Department of Environmental and Prevention Sciences, University of Ferrara

Total funded: 2.177 €

2023 – 2025 MUR (Italian Ministry of University and Research) PRIN 2022 PNRR

Project title: *Data-driven discovery and control of multi-scale interacting artificial agent systems*

Code: F53D23010050001

Total funded: 224.775 €

Role: Local coordinator of Ferrara's research unit (responsible for 16.500 € of funding)

2023 – 2025 "Fondo per l'Incentivazione alla Ricerca Dipartimentale" (FIRD) year 2023, University of Ferrara

Project title: *Caratterizzazione dell'interazione fluido-struttura nella modellistica cardiovascolare: sviluppo di legami costitutivi innovativi mediante tecniche di Machine Learning* (Characterization of fluid-structure interaction in cardiovascular modeling: development of novel constitutive laws using Machine Learning)

Total funded: 14.478 €

2023 – 2024 "Bando Giovani anno 2023 per progetti di ricerca finanziati con il contributo 5x1000 anno 2021", University of Ferrara

Project title: *Epidemie e benessere equo e sostenibile: analisi statistiche, modellistica e simulazioni computazionali* (Epidemics and equitable and sustainable well-being: statistical analysis, modeling and computational simulations)

Total funded: 6.500 €

2023 – 2024 "Bando per Progetti di Ricerca GNCS 2023" of the Italian National Group for Scientific Computing (INdAM–GNCS)

Project title: *Numerical methods for multiscale differential problems: high order schemes, optimization, control*

Code: E53C22001930001

Total funded: 2.500 €

2021 – 2022 "Finanziamento Giovani Ricercatori 2021-2022 GNCS" of the Italian National Group for Scientific Computing (INdAM–GNCS)

Project title: *Uncertainty quantification methods for hyperbolic balance laws*

Total funded: 1.500 €

2021 – 2022 Postdoctoral Fellowship of the Italian National Institute of High Mathematics "Francesco Severi" (INdAM), activity lines of the National Group for Scientific Computing (GNCS)

Project title: *Uncertainty quantification methods for hyperbolic balance laws on networks*

2019 – 2021 "Bando Giovani Ricercatori 2019 per il finanziamento di progetti di ricerca e mobilità internazionale (fondi 5x1000 anno 2017)", University of Ferrara

Project title: *Estensione della modellazione del flusso sanguigno nella rete cardiovascolare umana con sistemi aumentati di interazione fluido struttura* (Extension of blood flow modeling in the human cardiovascular network with augmented fluid-structure interaction systems)

Total funded: 5.500 €

Non-competitive calls

2025 – 2027 "Fondo di Ateneo per la Ricerca" (FAR) year 2025, University of Ferrara

Project title: *Unconventional numerical approaches for multiscale evolutionary dynamics in biomathematics: Monte Carlo particle methods, uncertainty quantification techniques, and structure-preserving machine learning tools.*

Total funded: 5.787 €

2024 – 2026 "Fondo di Ateneo per la Ricerca" (FAR) year 2024, University of Ferrara

Project title: *Unconventional numerical approaches for multiscale evolutionary dynamics in biomathematics: particle methods, uncertainty quantification, and data-driven optimal control problems.*

Total funded: 3.677 €

© European Union, 2002 – 2026 | https://europass.cedefop.europa.eu

2023 – 2025 "Fondo di Ateneo per la Ricerca" (FAR) year 2023, University of Ferrara
Project title: *Unconventional numerical approaches for multiscale problems in bio-mathematics*
Total funded: 2.977 €

PARTICIPATION IN RESEARCH PROJECTS

Competitive calls

2026 – 2028 "Fondo per l'Incentivazione alla Ricerca Dipartimentale" (FIRD) year 2026, University of Ferrara
Project title: *Decision-Making under Uncertainty in Corporate Crisis: Mathematical Models and Legal Perspectives*

2025 – 2027 "Fondo per l'Incentivazione alla Ricerca Dipartimentale" (FIRD) year 2025, University of Ferrara
Project title: *Approcci computazionali e di apprendimento automatico per lo studio di dinamiche affette da incertezza* (Computational and machine learning approaches for studying dynamics affected by uncertainty)

2024 – 2025 PNRR Cascade Call "Future Artificial Intelligence Research (FAIR)" – Spoke 8 "Pervasive AI", University of Bologna
Project title: *Advanced MATHematical methods for Artificial Intelligence* (MATH4AI)
Code: J33C22002830006 (FAIR)

2024 – 2025 "Bando per Progetti di Ricerca GNCS 2024" of the Italian National Group for Scientific Computing (INdAM–GNCS)
Project title: *Metodi numerici per le dinamiche incerte* (Numerical methods for uncertain dynamics)
Code: E53C23001670001

2023 – 2025 Horizon Europe Call "HORIZON-MSCA-2021-DN-01"
Project title: *DATAHYKING - Data-driven simulation, uncertainty quantification and optimization for hyperbolic and kinetic models*
Code: Grant Agreement n.101072546

2023 – 2024 "Bando Giovani anno 2022 per progetti di ricerca finanziati con il contributo 5x1000 anno 2020", University of Ferrara
Project title: *BIO-METAMAT: Modellazione e simulazione computazionale di metamateriali bio-ispirati* (BIO-METAMAT: Computational modeling and simulation of bio-inspired metamaterials)

2017 – 2022 MIUR (Italian Ministry of Education, University and Research) PRIN 2017
Project title: *Innovative numerical methods for evolutionary partial differential equations and applications*
Code: 2017KKJP4X

DISSEMINATION ACTIVITIES

2025
- *La matematica delle onde*, dissemination talk in the context of the event "Aperiscenza alla scoperta di Armonia e Ritmo della Natura", organized by the Department of Environmental and Prevention Sciences, University of Ferrara, hosted by Manifattura dei Marinati, Comacchio (FE).

© European Union, 2002 – 2026 | https://europass.cedefop.europa.eu

2023
- *La matematica come faro della prevenzione*, dissemination talk at the 2023 European Night of Researchers, University of Ferrara.
- *Decifriamo il codice della salute cardiovascolare con la matematica*, dissemination talk in the context of the event "Gli Aperiscenza della Prevenzione", organized by the Department of Environmental and Prevention Sciences, University of Ferrara
- Interview for the podcast "Scientificast" on the functioning of neural networks (episode 471, Integratori Carbonicamente Neurali). Full interview available here.

2022
- Perché l'incertezza domina il mondo e come possiamo quantificarla, dissemination talk for the online lecture series "Divulgazioni Notturne di Fisica Matematica" organized in the context of the GNFM-INdAM group.
- *La biologia con gli occhi della matematica*, dissemination talk at the 2022 European Night of Researchers, University of Ferrara.

PROFESSIONAL ACTIVITIES AND MEMBERSHIPS

Supervision of Post-doctoral fellows

May 2025 – May 2026 — *Raffaella Fiamma Cabini*, post-doc research grant (Assegno di Ricerca), University of Ferrara. Research project on Physics-Informed Neural Networks for applications in computational hemodynamics.

Supervision of students for Thesis

May – September 2025 — *Tonino Alessio Luciani*, Bachelor Thesis in Mechanical Engineering, University of Ferrara. Thesis title: *Models and methods for fluid–structure interaction in biofluid dynamics.*

Participation in Ph.D. Committees

- Member of the Committe of Juan Mairal Ascaso's Doctoral Thesis defense, Ph.D. in Fluid Mechanics, University of Zaragoza (July 2026).
- Member of the Committe of Pablo Solán-Fustero's Doctoral Thesis defense, Ph.D. in Fluid Mechanics, University of Zaragoza (November 2024).

Referee for Doctoral Thesis

- Referee of Alessia Casalucci's Doctoral Thesis, Ph.D. in Fluid Dynamic and Environmental Engineering, University of Genova (February 2025).

Participation in Scientific Committees

- 8^{th} *ECCOMAS Young Investigators Conference* (YIC2025), Pescara, Italy (17/09/2025 – 19/09/2025).
- *Workshop HIKE-LABS: High-dImensional Kinetic modEling, Learning and control of Agent-Based Systems*, Alba di Canazei, Italy (08/09/2025 – 12/09/2025).

Participation in Organizing Committees

- *Workshop "DataHyking Network-wide Research and Training Event"*, Ferrara, Italy (23/03/2026 – 27/03/2026).
- *Workshop "Mathematics for Machine Learning: Applications to PDEs and Related Fields"*, Ferrara, Italy (24/03/2025 – 26/03/2025).
- *"Numerical Aspects of Hyperbolic Balance Laws and Related Problems" – 2nd Young Researchers Conference* (NumAspYoung24), Ferrara, Italy (17/12/2024 – 19/12/2024).

Organization of Minisymposia

- MS *"Advances in data-driven approaches for multiscale agent-based systems"* at the 8^{th} ECCOMAS Young Investigators Conference (YIC 2025), Pescara, Italy (17/09/2025 – 19/09/2025).
- MS *"Quantifying Uncertainty in Kinetic and Hyperbolic PDEs: Numerical Insights"* at the SIAM Conference on Uncertainty Quantification (UQ24), Trieste, Italy (27/02/2024 – 01/03/2024).
- MS *"Kinetic equations: numerical methods and applications"* at the 2023 edition of the biannual Congress of the Italian Society of Applied and Industrial Mathematics (SIMAI 2023), Matera, Italy (28/08/2023 – 01/09/2023).

Member of Executive Boards

- "Centro Universitario per l'Intelligenza Artificiale" of the University of Ferrara (IA@UNIFE)

© European Union, 2002 – 2026 | https://europass.cedefop.europa.eu

Group Memberships
- "Centro di Modellistica, Calcolo e Statistica" (CMCS) of the University of Ferrara
- European Mathematical Society (EMS)
- European Mathematical Society Young Academy (EMYA)
- Istituto Nazionale di Alta Matematica "Francesco Severi" (INdAM), Gruppo Nazionale per il Calcolo Scientifico (GNCS)
- Società Italiana di Matematica Applicata e Industriale (SIMAI)
- Unione Matematica Italiana (UMI), "Socio-Epidemic Modeling" Group (MSE) and "Mathematics for Artificial Intelligence and Machine Learning" Group (AI&ML&MAT)

Guest Editor for Journals
- Mathematical Biosciences and Engineering (Special Issue: "Computational modeling and numerical methods in bio-mathematics and fluid dynamics")

Referee for Journals

Applied Mathematics and Computation • Applied Mathematics Letters • Applied Mathematical Modelling • Artificial Intelligence In Medicine • BioSystems • Communications in Computational Physics • Communications on Applied Mathematics and Computation • Computer Methods in Applied Mechanics and Engineering • Computer Methods in Biomechanics and Biomedical Engineering • Computer Modeling in Engineering and Sciences • Computers & Fluids • Computers & Mathematics with Applications • Computers and Mathematics with Applications • Ecology Letters • Epidemiologic Methods • Engineering Computations • Fluid Dynamics and Materials Processing • Heliyon • International Journal for Numerical Methods in Biomedical Engineering • International Journal of Nonlinear Sciences and Numerical Simulation • Journal of Advanced Research in Fluid Mechanics and Thermal Sciences • Journal of Computational Physics • Journal of Mathematical Biology • Journal of the Royal Society Interface • Mathematical Biosciences and Engineering • Multidiscipline Modeling in Materials and Structures • Nature Scientific Reports
